

Martin Ignacio Zangl

Senior Android & Mobile Engineer

Valencia, Spain

www.linkedin.com/in/martinzangl | github.com/mizangl | zanglmartin.github.io

PROFILE

I build reliable mobile products and developer-facing SDKs across Android, iOS, Flutter, and React Native.

SELECTED IMPACT

Crash-free usage: Approx. 70% to 99.6% · Lower memory consumption: Approx. 24% · Better CPU utilization: Approx. 33%

RECENT EXPERIENCE

Parser for Checkout.com

Senior Mobile Engineer | Dec 2025 - Jul 2026

- Fixed critical React Native SDK bugs and implemented required Android and iOS changes before completing the wrapper work for release.
- Developed the public Android sample using the iOS sample as the agreed design reference.
- Documented platform differences and created follow-up tasks.

Swift Medical

Senior Android Engineer | Mar 2023 - Oct 2025

- Introduced an application-owned database queue and separated connectivity policy from WorkManager scheduling.
- Piloted Coroutines in a low-priority synchronization area, compared memory and CPU behavior, then extended the migration.
- Profiled document creation and prioritized frequently used flows for a staged migration from RxJava and MVP to Coroutines and MVVM.

PayPal

Senior Android Engineer | Nov 2021 - Jan 2023

- Mapped the Savings journey and documented existing behavior before planning small refactors.
- Introduced integration and end-to-end validation alongside existing unit tests.
- Built a test library to inject and queue backend responses, including edge cases, with Page Objects for reusable customer journeys.

MercadoLibre

Senior Android Engineer | Apr 2020 - Nov 2021

- Built a small resource-handling SDK for shared assets.
- Helped define mobile and middle-end contracts for screen payloads and customer interaction events, contributing middle-end changes when needed.
- Created and registered UI components, documented complex behavior, and prepared components for shared use when reuse justified it.

Martin Zangl

Experience and expertise

EARLIER EXPERIENCE

Santex America

Senior Android Engineer | May 2015 - Apr 2020

Delivered mobile products across IoT, social, education, and gaming, including contributions to Words with Friends.

- Led Android development across an IoT e-bike platform, a CEO network, and a multi-university student portal.

Globant

Semi-Senior Android Engineer | May 2014 - May 2015

Delivered native Android solutions for enterprise clients including BBVA and JPMorgan Chase.

- Migrated legacy mobile web applications to native Android.

Taller Technologies

Android Engineer | Mar 2013 - May 2014

Contributed to Intel Context Aware middleware SDK and real-time retail solutions.

- Developed Android components for the Intel Context Aware middleware SDK.

Self-Employed

Software Engineer | Sep 2005 - Mar 2010

Built custom software for small businesses and prototyped embedded and mobile products.

- Delivered Java Swing desktop applications, a photo-order system, and an ERP solution.

TECHNICAL SKILLS

Core mobile languages: Kotlin, Java

Cross-platform delivery: Dart, Swift, TypeScript, JavaScript

Platform breadth: Objective-C, Node.js, Java EE, Ktor, Apache Spark

Mobile platform: Android SDK, Jetpack Compose, Coroutines, Flow, CameraX, WorkManager, Room, Flutter, React Native, AVFoundation

Quality and delivery: TDD, JUnit, MockK, Turbine, Espresso, UI Automator, JaCoCo, GitHub Actions, GitLab CI, Jenkins, Fastlane

EDUCATION

B.S. Information Systems Engineering

National Technological University · Córdoba, Argentina

LANGUAGES

Spanish: Native speaker · English: Full professional proficiency · German: Limited working proficiency · Italian: Limited working proficiency
