PROFILE

I build and stabilize Android products, most recently payment SDKs and an offline-first clinical app. When the work crosses a platform boundary, I follow it into React Native, Flutter, iOS, or Java services.

SELECTED IMPACT

Crash-free usage: Approx. 70% to 99.6% · Lower memory consumption: Approx. 24% · Better CPU utilization: Approx. 33%

RECENT EXPERIENCE

Parser for Checkout.com

Senior Android Engineer | Nov 2025 - Jul 2026

- Finished and published the public Jetpack Compose sample as working integration code for merchants, using the iOS sample as the UI and UX reference.
- Took over the React Native SDK until a specialist joined, resolved recurring crashes, and shipped two releases with changes to the Android and iOS dependencies.
- Added co-branded card support to close a feature gap with the web SDK, working directly with merchants to trace and prioritize integration issues.

Swift Medical

Senior Android Engineer | Mar 2023 - Oct 2025

- Moved synchronization state out of WorkManager and into an application-owned queue that preserved document order.
- Compared memory and CPU behavior in a low-priority Coroutines pilot before migrating the remaining synchronization work.
- Used Android Profiler and Perfetto to trace long-session leaks to bitmap handling and encryption work that blocked threads.

PayPal

Senior Android Engineer | Nov 2021 - Jan 2023

- Mapped the Savings journey and documented existing behavior before planning small refactors.
- Introduced integration and end-to-end validation alongside existing unit tests.
- Built a test library to inject and queue backend responses, including edge cases, with Page Objects for reusable customer journeys.

MercadoLibre

Senior Android Engineer | Apr 2020 - Nov 2021

- Built a resource SDK that made shared UI components and image resources available across the app.
- Built the installment-payment journey and virtual-card dashboard for Brazil. Customers could see available credit, review installment usage, and pay overdue amounts.
- Defined contracts between Android and the middle end, then changed its Java and Spark Framework implementation to support both flows.

Martin Zangl

Experience and expertise

EARLIER EXPERIENCE

Santex America

Senior Android Engineer | May 2015 - Apr 2020

Spent five years on Android products across IoT, education, social networking, and games.

- Built a Bluetooth Low Energy controller for an electric bike, led Vistage's move from mobile web to native Android, owned mobile releases, joined hiring interviews, and gave Android Meetup talks.

Globant

Android Engineer | May 2014 - May 2015

Shipped BBVA's Android app and moved JPMorgan Chase mobile-web applications to native Android.

- Built an internal app store for JPMorgan Chase application distribution and updates.

Taller Technologies

Android Engineer | Mar 2013 - May 2014

Built Android software for Intel's electronic price-tag system and contributed to its Context Aware middleware SDK.

- Joined the Electric Calculator team, implemented product features, and added test coverage.

Self-Employed

Software Engineer | Sep 2005 - Mar 2010

Built custom software for small businesses and prototyped embedded and mobile products.

- Delivered Java Swing desktop applications, a photo-order system, and an ERP solution.

TECHNICAL SKILLS

Android: Kotlin, Java, Jetpack Compose, Coroutines, Flow, Room, WorkManager, CameraX, Dagger/Hilt

Architecture: Modular applications, MVVM, MVI, Unidirectional data flow, Offline-first synchronization, SDK design

Testing: JUnit, MockK, Turbine, Mockito, Espresso, UI Automator, Integration testing, End-to-end testing

Delivery and diagnostics: Gradle, GitHub Actions, GitLab CI, Jenkins, Fastlane, Crashlytics, Perfetto, Android Profiler, Datadog, New Relic

Cross-platform and services: React Native/TypeScript, Flutter/Dart, Swift, Java/Spark Framework, REST, Retrofit, OkHttp

EDUCATION

Engineering Degree in Information Systems

Universidad Tecnológica Nacional · Córdoba, Argentina

LANGUAGES

Spanish: Native speaker · English: Full professional proficiency · German: Limited working proficiency · Italian: Limited working proficiency
