

Martin Ignacio Zangl

Senior Android Engineer | Senior Mobile Engineer

Valencia, Spain • [linkedin.com/in/martinzangl](https://www.linkedin.com/in/martinzangl) • github.com/mizangl

/ PROFESSIONAL SUMMARY

Senior Software Engineer with 15+ years building mobile products and developer-facing SDKs for companies including PayPal, MercadoLibre, Checkout.com, and Swift Medical. Specialist in Android and cross-platform delivery with strong experience in architectural modernization, performance optimization, testing culture, and mentoring. Product-oriented and customer-focused, with a record of delivering complex domains at scale.

/ SELECTED IMPACT

Reliability: improved crash-free performance from 70% to 99%. **Efficiency:** reduced memory use by approximately 24% and improved CPU utilization by approximately 33%. **Delivery:** shipped mobile products and SDKs across Android, iOS, Flutter, and React Native.

/ PROFESSIONAL EXPERIENCE

Parser for Checkout.com

Senior Mobile Engineer | Dec 2025 - Jul 2026

Contracted to Checkout.com and contributed to Flow, its payment SDK across Android, iOS, and React Native.

- Investigated and fixed defects across Android, React Native, and iOS SDKs.
- Developed Android support for new payment methods and card schemes.
- Delivered two React Native releases aligning the underlying Android and iOS SDK dependencies.
- Worked from product and API documentation using TDD and technical development documentation.
- Collaborated across platforms to keep SDK behavior consistent.

Technologies: Kotlin, Android SDK, Swift, iOS SDK, React Native, TypeScript, TDD, payment SDKs

Swift Medical

Senior Android Engineer | Mar 2023 - Oct 2025

Led technical transformation of a legacy Android application and contributed to a Flutter product for digital wound care and clinical imaging.

- Raised the crash-free rate from 70% to 99% by resolving concurrency issues and memory leaks.
- Reduced memory consumption by approximately 24% and improved CPU utilization by approximately 33% using Perfetto and Android Profiler.
- Migrated a monolithic codebase from RxJava and MVP toward Coroutines, MVVM, single source of truth, unidirectional data flow, and Jetpack Compose.
- Designed a low-resource analytics collector with offline buffering, batching, and reliable delivery.
- Improved offline synchronization reliability and expanded WorkManager test coverage.
- Built cross-platform camera infrastructure using CameraX, AVFoundation, image conversion, exposure controls, and image-processing improvements.
- Built native libraries for iPhone Simulator arm64 and an iOS Simulator mock camera for automated testing.

Technologies: Kotlin, Java, Compose, Coroutines, MVVM, Room, WorkManager, Flutter, Dart, Swift, OpenCV, CameraX, Perfetto, JUnit, MockK, FHIR

PayPal

Senior Android Engineer | Nov 2021 - Jan 2023

Developed PayPal Wallet modules with a focus on reusable architecture, testability, and cross-team collaboration.

- Built end-to-end wallet modules using MVVM/MVI, SOLID, single source of truth, and unidirectional data flow.
- Led refactors toward Kotlin Coroutines and reactive architecture.
- Expanded unit, integration, and automated end-to-end coverage and integrated reporting into CI.
- Improved Gradle pipelines and cross-team library distribution.

Technologies: Android Jetpack, Kotlin, Dagger/Hilt, Coroutines, Java, Jenkins, SonarQube, JaCoCo, Android tests, Splunk

MercadoLibre

Senior Android Engineer | Apr 2020 - Nov 2021

Led virtual credit-card features and reusable UI components within a large e-commerce and fintech platform.

- Architected complete virtual credit-card flows using a single source of truth and unidirectional data flow.
- Owned a reusable UI component library consumed across product verticals.
- Collaborated with backend, middle-end, and iOS teams.
- Instrumented Datadog metrics for key monetization KPIs.

Technologies: Android SDK, Jetpack, Kotlin, Coroutines, Java, Swift, Datadog, New Relic, Apache Spark, CI/CD

Santex America

Senior Android Engineer | May 2015 - Apr 2020

Delivered mobile products across IoT, social, education, and gaming domains.

- Led Android development across an IoT e-bike platform, a CEO network, and a multi-university student portal.
- Contributed to Words with Friends, a consumer product with 50M users.
- Implemented automated CI builds and improved build times with scripting.
- Organized onboarding and technical workshops on RxJava and Clean Architecture.

Technologies: Android, Java, Kotlin, Jetpack, JavaScript, Dart, Flutter, React Native, Objective-C, Swift, Firebase, Jenkins, CI/CD

Globant

Semi-Senior Android Engineer | May 2014 - May 2015

Delivered native Android solutions for enterprise clients including BBVA and JPMorgan Chase.

- Migrated legacy mobile web applications to native Android.
- Built a multithreaded conference-room booking application with timezone synchronization.
- Maintained platform tooling and a secure internal app-distribution platform.

Technologies: Android Studio, Java, Dagger, Jenkins, Apache Cordova, Git, Jira

Taller Technologies

Android Engineer | Mar 2013 - May 2014

Contributed to Intel Context Aware middleware SDK and real-time retail solutions.

- Developed Android components for the Intel Context Aware middleware SDK.
- Implemented an XMPP-based electronic price-tag client and internal tooling.
- Built migration tooling using Node.js.

Technologies: Android, Java, XMPP, Node.js

Self-Employed

Software Engineer | Sep 2005 - Mar 2010

Built custom software for small businesses and prototyped embedded and mobile products.

- Delivered Java Swing desktop applications, a photo-order system, and an ERP solution.
- Engineered an IoT taximeter integrating Arduino sensors, GPS, and a custom Android client.

Technologies: Java, Swing, Android, Arduino, GPS, IoT

/ TECHNICAL SKILLS

Mobile: Android (Kotlin, Java), Jetpack Compose, CameraX, WorkManager, Room, Coroutines, Flow; Flutter/Dart; iOS (Swift, Objective-C basics); React Native.

Architecture: MVVM, MVI, MVP, Clean Architecture, SOLID, single source of truth, unidirectional data flow.

Concurrency: Kotlin Coroutines, Flow, RxJava.

Testing: TDD, JUnit, MockK, Turbine, Mockito, Espresso, UI Automator, integration and end-to-end testing, JaCoCo.

APIs and backend: REST, Retrofit, OkHttp, mTLS, certificate pinning, Apache Spark, Node.js, Java EE, Ktor, AWS S3.

Data: Room, Realm, SQLite, DataStore, offline-first synchronization, Firebase Storage and Realtime Database.

DevOps and observability: Gradle, GitHub Actions, GitLab CI, Jenkins, CircleCI, Fastlane, SonarQube, Detekt, Ktlint, Crashlytics, Datadog, New Relic.

Domains: Fintech, payments, healthcare, FHIR, medical-device constraints, IoT, Bluetooth LE, and Arduino.

/ LANGUAGES

Spanish: Native • **English:** Full professional • **German:** Limited working • **Italian:** Limited working

/ EDUCATION

B.S. Information Systems Engineering

National Technological University, Córdoba, Argentina

Public portfolio: zanglmartin.github.io/zanglmartin
